

Alex Fau Ridao

DATA ENGINEER

ANALYTICS ENGINEER

SQL · CLOUD · DATABRICKS

PYSPARK · DBT · SNOWFLAKE

Sabadell, Barcelona, Spain afau2000@gmail.com +34 609 872 116 afau-r.github.io/portfolio-web/ linkedin.com/in/alex-fau-ridao

PROFESSIONAL PROFILE

Data Engineer / Analytics Engineer specialized in designing and deploying scalable data pipelines and architectures in Cloud, using Databricks, PySpark and SQL as core tools. Experienced across the full data lifecycle — ingestion, transformation, modeling, orchestration, quality and end-to-end traceability — through to consumption in Power BI, with exposure to modern stacks such as dbt and Snowflake, and a focus on building reusable, well-documented data logic.

PROFESSIONAL EXPERIENCE

- Analytics Engineer**

Jun 2025 — Present

[Mango](#) · Barcelona, Spain

 - Designed and deployed on Databricks (SQL + PySpark) an online availability system across tables with millions of rows, replacing static stock with a customer-perceived availability KPI built for the logistics team, improving metric accuracy by ~5pp.
 - Developed a data-driven multi-channel attribution pipeline (Markov chains, First/Last Touch, Linear, Time Decay) across tables with millions of rows, audited and validated by Deloitte, improving revenue allocation accuracy by 2-3% versus the last-click model.
 - Collaborated with the Data Engineering team on the end-to-end flow: GA4 navigation data exported to BigQuery, ingestion into the datalake, dbt modeling (Git-versioned), orchestration with Airflow, and an aggregated Snowflake layer feeding Looker dashboards.
- Audit Data Analytics**

Nov 2023 — Aug 2024

[Ernst & Young \(EY\)](#) · Barcelona, Spain

 - Extracted, cleaned and transformed data for multinational clients (SQL, Power Query) and modeled fact/dimension tables for consumption in Power BI.
 - Built and maintained dashboards and KPIs in Power BI (DAX), running reconciliations and quality controls to ensure figures matched source data.

DATA PROJECTS

- E-commerce Data Platform (Brazil)**

github.com/Afau-r/ecommerce-data-platform

 - End-to-end design of a data pipeline (Python + DuckDB + dbt) on the public Olist dataset, including dimensional modeling, quality tests and full documentation, built with support from LLM agents (Claude Code) to accelerate the development iteration.
- GainzTracker — Full-Stack Fitness App**

github.com/Afau-r/gainztracker

 - Designed and deployed the backend and database (FastAPI + Supabase/PostgreSQL), handling data modeling, server logic and progress report generation for users.
 - Built a data-driven coaching engine that computes personalized metrics (RPE, e1RM) from training history, developed with support from LLM agents to accelerate backend construction.

TECHNICAL SKILLS

DATA PLATFORMS & CLOUD Azure, Azure Databricks, Snowflake, Google Cloud Platform (BigQuery), Git.

DATA ENGINEERING PySpark / Apache Spark, SQL, dbt, ETL/ELT architecture, data modeling (fact/dimension tables), end-to-end quality control and traceability.

DEVOPS & ORCHESTRATION Airflow, working knowledge of Docker, Kubernetes and CI/CD.

BI & REPORTING Power BI (DAX, semantic models), Tableau, Looker, Google Analytics 4.

LANGUAGES Python, SQL, PySpark.

DATA SCIENCE & FORECASTING Predictive modeling, clustering, time-series forecasting, regression, classification.

PYTHON LIBRARIES Pandas, NumPy, Scikit-learn, Statsmodels, MLForecast, Matplotlib, Seaborn.

EDUCATION

Master's in Data Analysis and Artificial Intelligence
ISDI Digital Group · 2024 – 2025

BA in Economics, minor in Statistics, Econometrics and Quantitative Economics
Universitat Autònoma de Barcelona · 2019 – 2023

LANGUAGES

Catalan — Native **Spanish** — Native **English** — B2 (Upper Intermediate)
