

Alex Fau Ridao

DATA ENGINEER

ANALYTICS ENGINEER

SQL · CLOUD · DATABRICKS

PYSPARK · DBT · SNOWFLAKE

Sabadell, Barcelona, Spain afau2000@gmail.com +34 609 872 116 afau-r.github.io/portfolio-web/ linkedin.com/in/alex-fau-ridao

PROFESSIONAL PROFILE

Data Engineer specialized in designing and deploying scalable data pipelines and architectures in Cloud, using Microsoft Fabric, Azure, Databricks, PySpark and SQL as core tools. Experienced across the full data lifecycle — ingestion, transformation, modeling, orchestration, quality and end-to-end traceability — through to consumption in Power BI, with exposure to modern stacks such as dbt and Snowflake, and a focus on building reusable, well-documented data logic, always looking for challenges that involve innovation and real impact.

PROFESSIONAL EXPERIENCE

Data Engineer

Sept 2026 – Present

Moventia · Sant Cugat del Vallès, Spain

- Part of Moventia's Business Intelligence team (Movento and Moventis) as the Back-End profile, tasked with extending to Catalonia and Madrid the KPI control system built by the data team in Saudi Arabia, migrating from Board to the Microsoft Fabric / Power BI ecosystem.
- Designing data architectures under the Medallion approach and star-schema dimensional modeling (facts, dimensions, SCD) over mileage, driver, workshop, quality, planning and logistics data, replicating the technical foundation already proven in Saudi Arabia with pipelines in Microsoft Fabric (Data Factory, PySpark Notebooks, Lakehouse, Warehouse) on top of OneLake.
- Working closely with business and BI teams to keep the data model oriented to analytical consumption, supporting Power BI and integrating AI (Azure OpenAI, Copilot in Fabric, RAG) where it adds real value.

Analytics Engineer

Jun 2025 – Aug 2026

Mango · Barcelona, Spain

- Designed and deployed on Databricks (SQL + PySpark) an online availability system across tables with millions of rows, replacing static stock with a customer-perceived availability KPI built for the logistics team, improving metric accuracy by ~5pp.
- Developed a data-driven multi-channel attribution pipeline (Markov chains, First/Last Touch, Linear, Time Decay) across tables with millions of rows, audited and validated by Deloitte, improving revenue allocation accuracy by 2-3% versus the last-click model.
- Collaborated with the Data Engineering team on the end-to-end flow: GA4 navigation data exported to BigQuery, ingestion into the datalake, dbt modeling (Git-versioned), orchestration with Airflow, and an aggregated Snowflake layer feeding Looker dashboards.

Audit Data Analytics

Nov 2023 – Aug 2024

Ernst & Young (EY) · Barcelona, Spain

- Extracted, cleaned and transformed data for multinational clients (SQL, Power Query) and modeled fact/dimension tables for consumption in Power BI.
- Built and maintained dashboards and KPIs in Power BI (DAX), running reconciliations and quality controls to ensure figures matched source data.

DATA PROJECTS

GainzTracker — Full-Stack Fitness App gainztracker-three.vercel.app

- Designed and deployed the backend and database (FastAPI + Supabase/PostgreSQL), handling data modeling, server logic and progress report generation for users.

E-commerce Data Platform (Brazil) github.com/Afau-r/ecommerce-data-platform

- End-to-end design of a data pipeline (Python + DuckDB + dbt) on the public Olist dataset, including dimensional modeling, quality tests and full documentation, built with support from LLM agents (Claude Code) to accelerate the development iteration.

TECHNICAL SKILLS

PLATFORMS & CLOUD Azure, Microsoft Fabric (Lakehouse, Data Factory, Notebooks, Warehouse, OneLake), Databricks, Snowflake, BigQuery, Git/GitHub.

DATA ENGINEERING PySpark/Spark, advanced SQL, dbt, Medallion architecture (Bronze/Silver/Gold), star-schema dimensional modeling (facts, dimensions, SCD), ETL/ELT, end-to-end quality and traceability.

GOVERNANCE & DEVOPS Microsoft Purview, CI/CD, Airflow, Docker/Kubernetes, GDPR.

BI & REPORTING Power BI (DAX, semantic models), Tableau, Looker, Google Analytics 4.

APPLIED AI Azure OpenAI, Copilot in Fabric, RAG, LLM agents (Claude Code) and automation.

PYTHON LIBRARIES Pandas, NumPy, Scikit-learn, Statsmodels, MLForecast, Matplotlib, Seaborn.

EDUCATION

Master's in Data Analysis and Artificial Intelligence
ISDI Digital Group · 2024 – 2025

BA in Economics, minor in Statistics and Econometrics
Universitat Autònoma de Barcelona · 2019 – 2023

LANGUAGES

Catalan — Native

Spanish — Native

English — B2 (Upper Intermediate)
